Eric and Chip,

Below is info from Mark Pugh regarding the status of an updated SCE for Sulzer. It looks like it was expected to be in October. According to Mark, he expects that the updated SCE will include a weight of evidence evaluation regarding the groundwater pathway and the need for monitoring wells.

Matt

Matt,

Below is the latest communication regarding schedule. It may be that the storm water piece will be complete with the next submission. Groundwater to surface water is still unresolved. They had PAHs over SLVs in direct push GW samples. They have not installed wells but may need to do so.

Attached is a spreadsheet with more detailed information.

Hi Mark,

Thanks for checking. A data report with some clarifications related to your comment letter is in the works and should be out in the next couple weeks. I have had to focus on a time sensitive project for the last months and have recently enlisted some help with Sulzer to get it submitted to you. Sorry to not get back to you sooner regarding this. Please let me know if you have further questions.

thanks,

Steve

Steve,

Just doing my quarterly check in. Is Sulzer going to submit a report anytime soon? Thanks.

Mark Pugh, R.G.
